Job Title	Project Manager
Department	Operations
Location	Jaipur
About Gram Power	<p>Gram Power is an energy technology company founded out of Berkeley, California. We have developed disruptive Smart Grid technology to radically change the way electricity is supplied to and consumed by users. Our work has resulted in us designing the lowest cost smart meter in the world, the most advanced power distribution management technology and a Smart Grid solution for delivering energy to remote areas. Our technology enables rural and urban consumers to access reliable and clean energy, and to control and optimize their electricity expenses using their phones. Consumers pay for power just like they purchase recharge coupons for cell phones and interact with their power distribution companies like never before. Our technology also helps eliminate theft, pilferage or non-payment of power bills and was selected by NASA among the top 10 cleantech innovations around the world.</p> <p>We have so far brought Smart Grids to 30 remote areas in rural India and are now poised to take our technology to the national grid by managing power distribution for India's biggest private power distribution company. We will also be soon launching in Africa to bring energy to 1 million families. With strong funders from Europe and Silicon Valley, we are now bringing the benefits of our intelligent energy technology to rural and urban areas worldwide.</p>
About The Position	<p>Project Management at Gram Power is a very multidisciplinary role and meant for individuals who can perform wear different hats. Our Project Managers take up one or more projects each year and act as the interface between Gram Power's customers and our internal team. The goal of this role is to manage all stakeholders effectively to complete the projects on time, within budgets and as per the prescribed quality parameters. As a Project Manager, you could get an opportunity to manage setup of Smart Grids in the hinterlands of India, or revamp the complete power distribution network in a major city, or even manage a completely new product development cycle at Gram Power from idea to commercialization!</p>
